What is TRECVID?

Workshop series (2001 – present) → <http://trecvid.nist.gov>

to promote research/progress in content-based video analysis/exploitation

Foundation for large-scale laboratory testing

Forum for the

- exchange of research ideas
- discussion of approaches – what works, what doesn't, and why.

Focus: content-based approaches

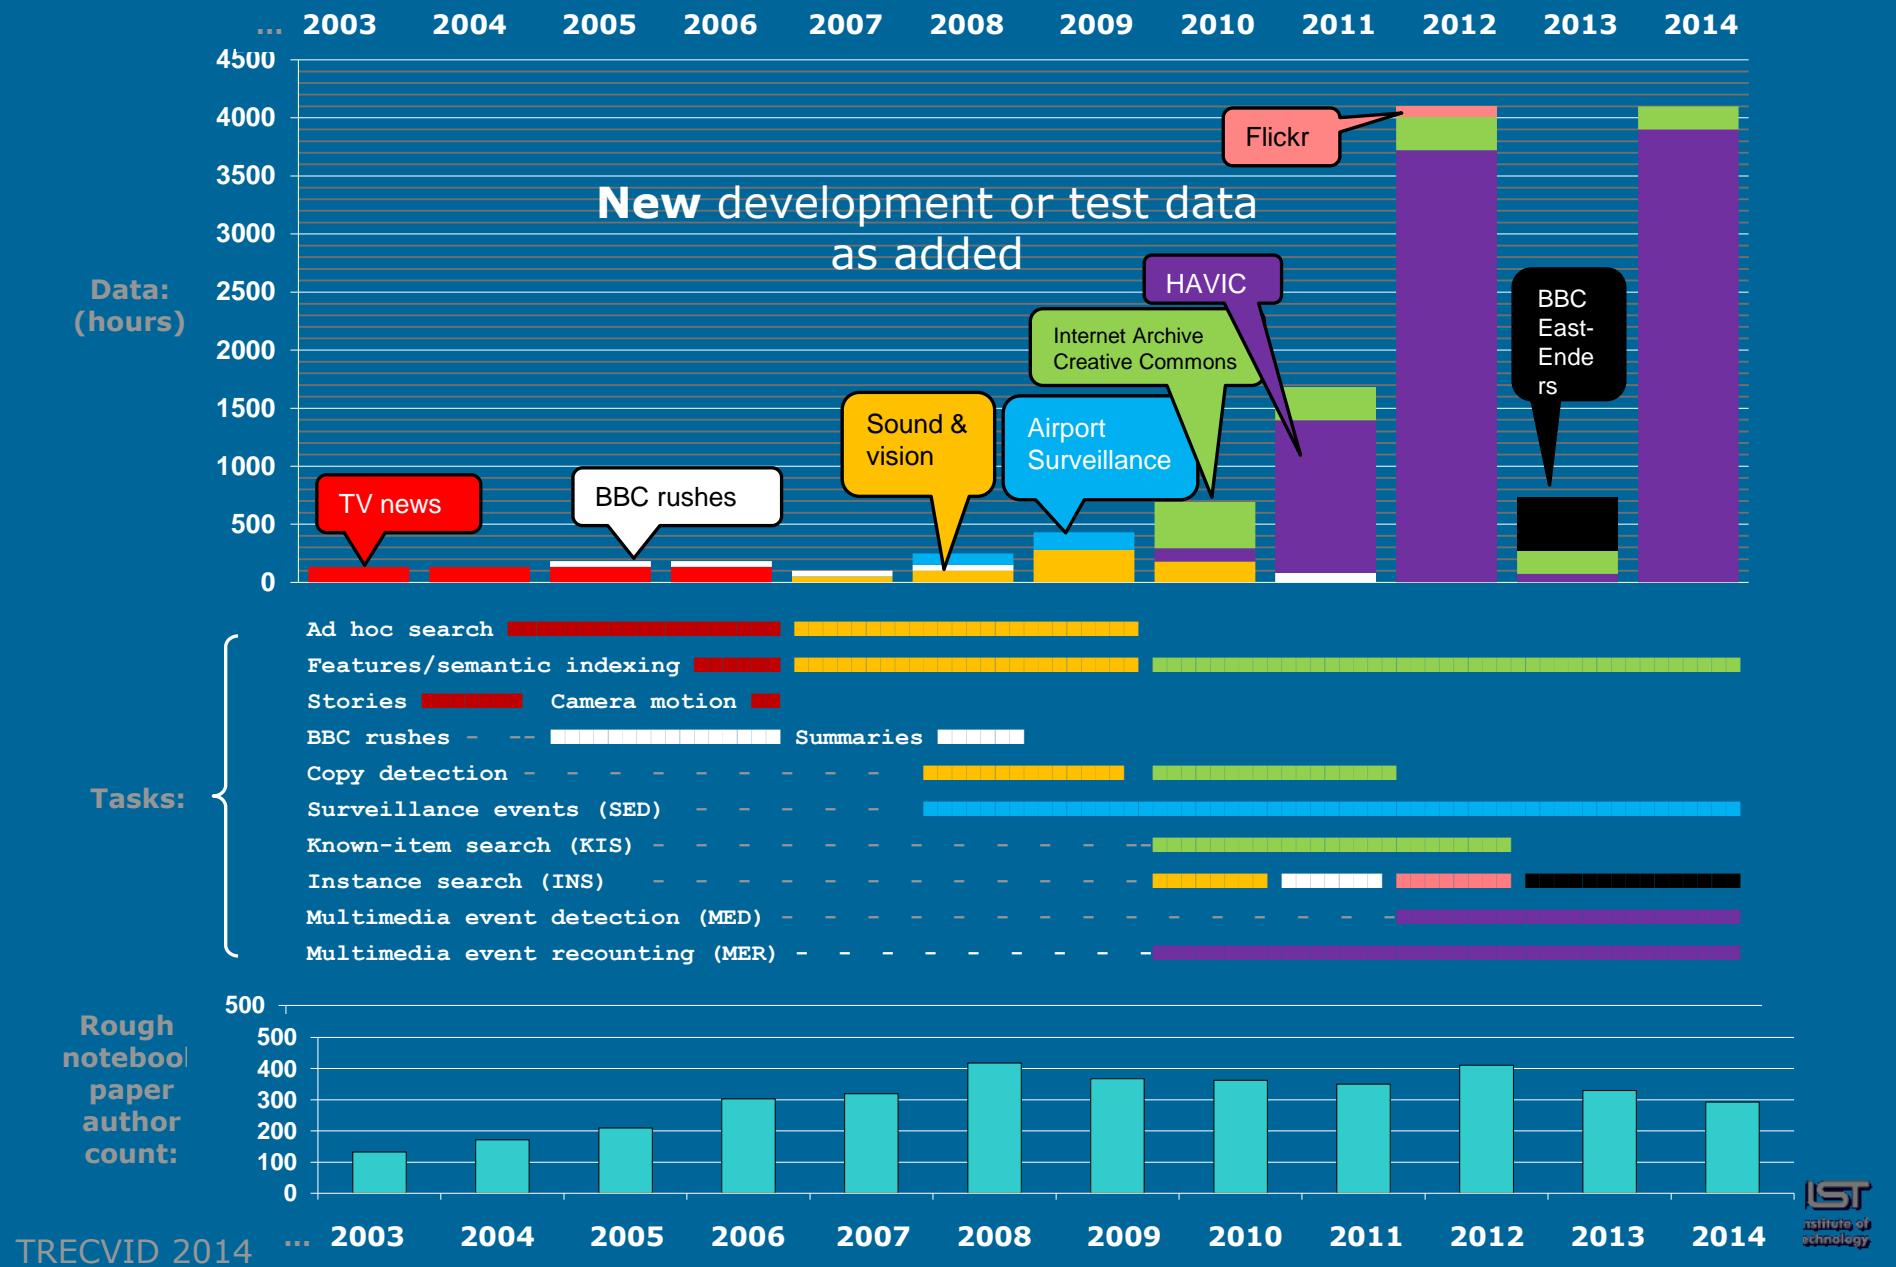

- search / detection / summarization / segmentation / ...

Aims for realistic system tasks and test collections

- unfiltered data
- focus on relatively high-level functionality (e.g. interactive search)
- measurement against human abilities

Provides data, tasks, and uniform, appropriate scoring procedures

TRECVID's Evolution

TRECVID 2014 Tasks and Data

Internet Archive – Creative Commons (IACC) 200 hours test data, video, title, keywords, description 687 hours dev video, metadata	BBC EastEnders 464 hours divided into 471527 shots	Airport surveillance 50 hours, test video 100 hours, dev video	HAVIC - Internet multimedia 7580 hours, test video 2116 hours, dev video
Semantic indexing (60 known test concepts submitted; 30 Evaluated, 10 for localization)	Instance search (27 ad hoc image test queries)	Surveillance event detection (interactive) (7 known test events)	Multimedia event detection (20 pre-specified &/or 10 ad hoc complex test events)
			Multimedia event recounting pilot (10 events)

Groups Finished	Task code	Task name
4	SED	Surveillance event detection
15	SIN	Semantic indexing
23	INS	Instance search
17	MED	Multimedia event detection
7	MER	Multimedia event recounting

Unique finishing teams

Support

Co-sponsor: University of Central Florida,
Center for Research in Computer Vision

The running of TRECVID 2014 has been funded directly by:

- National Institute of Standards and Technology (NIST)
- Intelligence Advanced Research Projects Activity (IARPA)

TRECVID is only possible because of the additional efforts of many individuals and groups around the world.

Additional resources and contributions

- Georges Quénot and the QUAERO team
 - shared coordination of the semantic indexing task
 - provided the master shot reference for the IACC.2 video
 - arranged for ASR for IACC.2 video
- Koichi Shinoda of the TokyoTechCanon team agreed to host a copy of the IACC.2 data
- The LIMSI Spoken Language Processing Group and VexSys Research provided ASR for the IACC.2 videos
- Noel O'Connor and Kevin McGuinness at Dublin City University along with Robin Aly at the University of Twente worked with NIST and Andy O'Dwyer plus William Hayes at the BBC to make the BBC EastEnders video available for use in TRECVID

Agenda: Day 1

- Arranged by task
- Time for discussion of approaches & evaluation
- Monday
 - Intros, thanks, etc.
 - Semantic indexing
 - Single concepts, localization
 - Lunch (on your own)
 - Instance search
 - Workshop dinner

Agenda: Day 2

- Tuesday
 - Multimedia event detection and recounting
 - Lunch (on your own); CRCV Open House
 - Multimedia event detection and recounting (conclusion)
 - Poster/demo boaster
 - Posters and demos with refreshments

Agenda: Day 3

- Wednesday
 - Surveillance event detection
 - TRECVID planning
 - Workshop close

Miscellany

- If you have registered for the workshop dinner and will not be using your ticket, please turn it in at the registration desk during the break this morning or at lunch so someone else who wants to attend can use it.
- Extra time has been built into the schedule since many of us will be walking to lunch. Links to information about places to eat in the vicinity are included in the agenda. UCF students are ready to help.
- Questions?
